

SCIENCE-BASED SPEED TRAINING / IMPLEMENTATION SPECIFICATION

SprintLab Workout Library and Season Engine

V3

The implementation specification for SprintLab's deterministic workout library, season logic, weekly planner, execution model, and regression behavior.

VERSION

3.0

CREATED

July 30, 2026

IMPLEMENTATION REVIEWED

SprintLab 1.0.0 working tree based on c00bd88

BASE COMMIT

c00bd885e64d52e624b3cf38cc15ab3 260 915 586

SOURCE OF TRUTH

Current repository behavior and passing planner regressions

Prepared from the current SprintLab working tree. V2 is background material only.

DOCUMENT MAP

Contents

02	Change summary from V2
03	Athlete profile inputs actually used
04	Supported pathways
05	Training levels, tiers, and readiness
06	Current implemented schemas
07	Deterministic weekly-plan generation
08	Execution, tracking, completion, and logging
09	Exercise resolution and alternatives
10	Library approval validation
11	Approved workout-record inventory
12	Verified profile behavior
13	Research rationale and citations
14	Known limitations and planned behavior
A	Nonselectable draft and archived records

Authority, purpose, and scope

V3 replaces V2 as the implementation specification. It describes what the current code stores, selects, displays, tracks, and verifies. V2 and the research documents remain background and scientific rationale; they do not override tested behavior.

REVIEWED STATE

App version 1.0.0; working tree based on commit c00bd885e64d52e624b3cf38cc15ab3 260 915 586. The repository had uncommitted planner, library, execution, and onboarding changes during review, so this document identifies the exact base commit and creation date rather than pretending the reviewed state is a clean commit.

What the system does

- Stores reviewed workout records with eligibility metadata, prescriptions, six authored sections, metrics, progression links, and approval state.
- Derives a season phase, allocates a weekly high/low architecture, filters eligible records, ranks deterministic candidates, pairs strength, and returns a seven-day preview.
- Converts selected library records into executable PlannedWorkout snapshots, records per-rep or per-set results where supported, and saves completed-session logs.
- Applies daily readiness guidance before launch and applies one-tier weekly regression for Football/40-Yard and General Speed when current pain, return-to-training, or taper context is present.

Deterministic versus personalized

Deterministic	Personalized by saved inputs
Weekly role order; hard gates; candidate scoring; tie-breaks; approved-record selection; paired strength IDs; schedule construction.	Event/pathway, experience tier, season phase, availability, practice/competition blocks, goal-score bonus, session-duration bonus, plan mode, and selected non-track tier regression.
Same inputs and same library state return the same week.	The system does not use a live AI model and does not generate new workouts.

Outside current implementation

- No live AI coaching, cloud account, Supabase backend, payments, or native-only planning dependency.
- No dedicated soccer, basketball, baseball/softball, lacrosse, rugby, or volleyball progression; those profiles route through the general linear-speed planner unless Football is primary.
- No verified performance projection or guarantee.
- No complete first-class representation of sprint set boundaries or per-side dosing in execution.

Change summary from V2

Area	V2/background	Verified V3 implementation
Authority	V2 described an intended architecture.	V3 documents the current TypeScript implementation and passing regressions.
Library size	Background inventory and protocols.	70 seeded records: 64 eligible Approved, 4 Draft, 2 Archived.
Pathways	Broad track/library concepts.	Four documented planning pathways: 60m/100m, 200m/400m, Football/40-Yard, General Speed; shared/support records are selectable where eligible.

Area	V2/background	Verified V3 implementation
Week generation	Conceptual season templates.	Real high/low weekly architecture plus deterministic record filtering, ranking, strength pairing, and seven-day schedule output.
Access	Access questions treated as planner constraints.	Ordinary missing access is treated as unknown/standard; only specialized assisted/force-plate technology is gated.
Readiness	General readiness concept.	Daily green/yellow/red launch evaluation is separate from weekly tier regression; tier regression is currently non-track only.
Execution	Schema intent.	Strength sets persist; track set boundaries are currently flattened and documented as a defect.
Validation	Broader intended approval rules.	V3 lists only implemented checks and marks stricter dose/reference checks as planned.

03 / PLANNER INPUTS

Athlete profile inputs actually used

Input	How current code uses it	Not used / caveat
primarySport / sport	Track uses the track planner; Football uses the 40-yard planner; every other non-track sport uses General Speed.	sports[] and sportPosition are not used to specialize weekly selection.
primaryEvent	60m/100m → short pathway; 200m/400m → long pathway; unsupported track events fall back to 100m.	Secondary events and personal bests do not choose records.
experienceLevel	beginner→foundation; developing→developing; intermediate→trained; advanced/elite→advanced.	It gates eligible records and changes beginner architecture; it does not create a separate strength system.
trainingDaysPerWeek / availableTrainingDays	Exact available days are used when present; otherwise 1–5 day defaults are filled.	Planner caps generated roles at five.
preferredRestDay	Blocked when preferredRestDayAnswered is not false.	A migration default can still block unless explicitly marked unanswered.
sportPracticeDays / otherSportDays	Blocked before session matching.	Practices are not inserted as executable sessions; they appear as open/existing training days.
gameOrCompetitionDays / priorityMeets	Current-week dates or recurring weekdays are blocked; meet windows filter candidates.	gameScheduleVaries and currentTeamTrainingLoad do not directly score candidates.
busySchoolDays	Avoided when auto-placing days, then used only if needed to fill the requested count.	Does not lower training quality.
seasonCalendar / seasonPhaseOverride / trainingContext	Derives general prep, specific prep, precompetition, competition, taper, or transition. Override is honored.	Without enough calendar context the planner may return needs-calendar/no-match.
currentPain / return-to-training	Regresses Football/General Speed one tier; also informs explanations.	Does not currently regress track weekly tier.
usualSessionDurationMinutes	Adds a small ranking bonus when candidate minimum duration fits.	Does not hard-exclude longer sessions.
speedGoals	Adds a small candidate score when record speedGoals overlap.	Does not create a workout.
trainingPlanMode / loggingOnlyMode	Coach/log modes suppress generated weeks.	Library and logging remain usable.
ordinary access/equipment fields	Displayed in setup and workout alternatives; current logistics matching assumes standard authored sessions.	Track, gym, blocks, sled, cones, and normal weight-room answers do not gate recommendations.

04 / PROGRAM SCOPE

Supported pathways

Pathway	Current intent	Verified selection behavior
60m / 100m	Starts, acceleration, upright/max velocity, limited speed endurance, paired strength, and lower-output support.	Track planner; EventPathway key is short-sprint-100-200. 60m and 100m share the same architecture but event tags filter records.
200m / 400m	Acceleration, upright speed, tempo, controlled speed endurance, later special endurance, and paired strength.	Track planner; EventPathway key is long-sprint-200-400. 200m maps here, but architecture's long-sprint flag currently checks only 400m.
Football / 40-Yard	Distinct tiered early acceleration and upright-speed records, then trained/advanced transfer work.	Non-track planner using F40-ACC-01/02/03 and F40-MAX-01/02/03 plus F40-TRANSFER-01.
General Speed	Linear acceleration, upright speed, low technical/support work, tiered records, and trained/advanced integration.	Non-track planner using GEN-ACC-01/02/03, GEN-MAX-01/02/03, GEN-LOW-01, GEN-INTEGRATE-01 and support records.
Shared / Support	Tempo, strength, plyometrics, core, testing, meet preparation, and records eligible across pathways.	Chosen through shared pathway metadata, preferred IDs, category alternatives, and deterministic ranking.

05 / DOSAGE & REGRESSION

Training levels, tiers, and readiness

Profile answer	Library level	Planner meaning
Beginner	foundation	Beginner architecture; lower-complexity fifth role; still receives loaded strength and explosive work.
Developing	developing	Eligible developing records; non-track tier currently resolves to foundation.
Intermediate	trained	Full trained weekly structure and trained tiered Football/General records.
Advanced / Elite	advanced	Advanced eligible records; Football/General use tier 03.

Weekly tier regression

For Football/40-Yard and General Speed only, currentPain=true, trainingContext=return-to-training, or taper reduces an advanced tier to trained, or trained to foundation. The explanation includes: “This session was reduced one reviewed level...” The selector never chooses a record above the resulting eligible level.

Daily readiness launch evaluation

- Red: severe/acute pain, expected hesitation at maximum speed, or a worse warm-up reassessment. Maximal sprinting must not begin.
- Yellow: sleep below personal/referenced baseline, low sleep quality, reduced neural readiness/focus, underfueling, low hydration, soreness ≥3/5, or localized discomfort.
- Soreness 5/5, severe/acute pain, hesitation, or a worse warm-up sets maximalSprintRestricted=true.
- Yellow without a reassessment asks for better/same/worse after warm-up. Daily readiness does not rebuild the saved week.

IMPORTANT SCOPE BOUNDARY

The daily readiness check changes launch guidance. The weekly planner’s tier regression currently reads profile-level currentPain/return-to-training/taper only, and only in the Football/General branch.

Current implemented schemas

The excerpts below are simplified only for presentation. Field names and unions match the current TypeScript implementation. Optional sport-aware metadata is additive; it does not replace the core track-library fields.

Library workout and item

```
type LibraryWorkoutItem = {
  id: string; name: string;
  sets?: number; reps?: number;
  distanceMeters?: number; fastZoneMeters?: number;
  durationSeconds?: number;
  intensity?: { basis: min?; max?; description };
  recovery?: { afterRepSeconds?: afterSetSeconds?;
    rangeSeconds?: description };
  coachingCues: string[]; notes?: string;
  countsTowardSprintVolume: boolean;
  countsTowardHighIntensityVolume: boolean;
};

type LibraryWorkout = {
  id; slug; name; purpose; intendedAthlete;
  primaryCategory; secondaryCategories[];
  eventPathways[]; eventTags[]; athleteLevels[]; seasonPhases[];
  specialistProfiles[]; equipmentRequired[]; equipmentOptional[];
  surface: { required[]; preferred[]; prohibited[]; notes };
  sections: { warmup; sprintWork; plyometrics;
    strength; coreBodyweight; cooldown };
  intensitySummary; recoverySummary; metrics;
  coachingCues[]; modifications[]; safetyNotes[]; sourceNotes[];
  familyId; progressionLevel; regressionWorkoutId?;
  progressionWorkoutId?; version; approvalStatus;
  createdAt; updatedAt; archivedAt?;
  sports?; speedGoals?; speedPathways?; trainingContexts?;
  distanceUnit?; testType?; directionPattern?;
};
```

Planner output

```
type SuggestedPlanDay = {
  dayIndex; weeklyRole; loadClass; targetCategory;
  workoutId; supportWorkoutIds[];
  plannedWorkout;
  whyThisFits[]; harderOptionsExcluded[];
  requiredSetup; stopRule; alternatives[];
};

type WeeklyPlanSuggestion =
  | { status: "ready"; schedule[]; suggestions[];
    summary; warnings[] }
  | { status: "coach-managed" | "unsupported-sport" | "no-match";
    title; message; reasons[] };
```

Execution and saved results

```
type ExerciseTracking =
  | { kind: "completion" }
  | { kind: "track"; reps; distanceMeters?;
    targetIntensity?; restSeconds? }
  | { kind: "strength"; sets; targetReps;
    targetLoad?; restSeconds? };

type ActualExerciseResult = {
  exerciseId; sectionTitle; trackingKind; origin?;
```

```
exerciseSnapshot?: status; changeReason?: notes;
trackReps?: TrackRepResult[];
strengthSets?: StrengthSetResult[];
quickCompletionSnapshot?: {
  status; trackRepStatuses?; strengthSetStatuses?;
};
};
```

EXECUTION-STRUCTURE CONFLICT

The library stores sets and reps separately. Strength execution preserves both. Sprint execution currently converts (sets × reps) into one flat rep count, so 2×5 becomes 10 sequential reps in the active session and stored result. Per-side structure is not a first-class field. V3 records this as an unresolved implementation limitation rather than claiming full fidelity.

07 / SELECTION ENGINE

Complete deterministic weekly-plan generation

- 01 Respect plan mode. Logging-only and coach-plan modes return coach-managed output and do not generate a week.
- 02 Derive season phase from the calendar or explicit override. A needs-calendar result stops generation rather than guessing.
- 03 Resolve open weekdays. Preferred rest, practices, another sport, current-week competitions, and priority meets are blocked before matching.
- 04 Choose the pathway branch: Track for primary track sport; Football for primary Football; General Speed for all other non-track sports.
- 05 Build weekly roles. Track uses phase/event/experience architecture; Football/General uses tiered acceleration, upright speed, low support, and optional integration.
- 06 Hard-gate candidates: Approved and validation-clean; matching pathway/event/level/phase; meet-window allowed; no specialized assisted/force-plate requirement.
- 07 Rank deterministically. Category fit (40), event (25), phase (20), speed-goal overlap (10), duration fit (5), minus progressionLevel; preferred IDs receive priority; ID is the final tie-break.
- 08 Pair strength on authored high-output roles, normally STR-01 then STR-02, consolidating hard work on quality days.
- 09 Build PlannedWorkout snapshots and a Monday–Sunday schedule. Unselected days remain explained open/rest days.
- 10 Return explanations, excluded harder options, setup, stop rule, and up to two approved alternatives. The current plan changes only after explicit save.

Track general-preparation defaults

Role	Load	Default content
1	High	Acceleration + paired strength
2	Low	Extensive tempo / capacity
3	High	Maximum velocity + paired strength
4	Low	Technical low day
5	High or moderate	Speed endurance; beginner receives elastic power instead

Football and General Speed defaults

Days	Roles
2	Acceleration; upright speed
3	Acceleration; low technical/support; upright speed

Days	Roles
4	Acceleration; low technical/support; upright speed; movement/trunk support
5 beginner/developing	Same first four plus elastic movement foundation
5 trained/advanced	Same first four plus 40-yard transfer or acceleration integration
In season	At most three roles: speed microdose, recovery support, reduced support

DETERMINISM

Candidate scores, preferred-ID order, progression level, and record ID provide stable tie-breaking. No random dialogue or workout generation participates in plan selection.

08 / FROM RECORD TO LOG

Execution, tracking, completion, and logging

Library structure	Current execution structure	Saved behavior
Strength 3×3, 2×10, etc.	strength tracking with sets and targetReps.	One StrengthSetResult per set; load and reps can be recorded; quick completion snapshots preserve statuses.
Sprint 2×5 at 100 m	track tracking with reps=10 and distance=100.	Ten TrackRepResult items; set boundary and between-set rest are not represented.
Per-side work	Usually text in notes/detail.	No dedicated side key or left/right result array.
Timed hold	If in strength section, duration often becomes target text/detail; otherwise completion-only.	No generic per-set duration result field.
Distance repetition	track tracking with rep count, distance, target intensity, and one restSeconds value.	Per-rep completion/time/feeling can be saved.
Warm-up, plyometric, cooldown, many circuits	completion tracking.	Completed/skipped/pending only; authored dose remains in snapshot detail.
Whole-exercise quick completion	Marks all child reps/sets completed and saves prior statuses.	Undo restores statuses without deleting manual times, loads, notes, or feedback.

Completion pipeline

- 01 Selected library records are converted to immutable PlannedWorkout snapshots.
- 02 ActiveWorkoutSession initializes ActualExerciseResult entries and child track reps or strength sets.
- 03 Rep/set/exercise controls update pending/completed/skipped state. Added or changed work retains an origin and change reason.
- 04 Post-workout review saves completion, RPE, energy, soreness fields, optional notes, and a structured domain log when available.
- 05 Completed history retains the planned snapshot, actual results, timestamps, readiness snapshot, and review.

09 / RESOLUTION

Exercise alternatives

The weekly selector chooses whole workout alternatives deterministically. Inside several Approved records, exercise names still contain human-readable options such as “Back squat or trap-bar deadlift” or “Box jump or broad jump.” The current data model does not represent these as typed choice objects, and the planner does not resolve them from equipment.

Alternative type	Current behavior	V3 status
Whole workout	Planner ranks candidates and exposes up to two Approved alternatives; athlete can replace the day.	Implemented

Alternative type	Current behavior	V3 status
Equipment substitution in item name	Displayed as one executable label; athlete/coach interprets the option.	Implemented but unresolved
Typed exercise choice	No alternative IDs/options array in LibraryWorkoutItem.	Not implemented
Per-side variant	Often described in notes only.	Not implemented as tracking structure

CONFLICT WITH REQUESTED IDEAL

V3 cannot claim that every exercise alternative is deterministically resolved or selected through a structured UI. Several Approved records retain unresolved “or” labels. This is a validation and execution limitation.

10 / APPROVAL GATE

Library approval validation

Implemented checks

- No “TBD” content anywhere in the serialized record.
- Name, purpose, and intended athlete are present.
- At least one pathway, event, athlete level, and season phase.
- At least one required surface.
- Workout-level intensity summary, recovery summary, coaching cues, safety notes, and source notes.
- All six workout sections exist and contain item arrays.
- Stored total and high-intensity sprint volumes exactly match calculated section-item volumes.
- Special-endurance records include 200m/400m event and phase restrictions.
- Advanced drop-jump names require an override and are rejected by the prototype.
- Overspeed/downhill names are rejected from Approved status.
- Approved workouts cannot be silently edited; revisions begin as Draft. Archived records restore to Draft.

Requested rules not yet enforced

- Unnamed or semantically vague circuits, mobility, warm-up, cooldown, or prehab blocks.
- “Quality reps” without a numeric dose.
- Undefined exercise references or typed exercise-registry lookups.
- Unresolved within-item alternatives such as “A or B.”
- Unsupported per-side, interval, block, or circuit execution structures.
- Item-level missing rest/intensity/completion metadata.
- Contradictory sets/reps versus execution tracking beyond sprint-volume arithmetic.

APPROVAL RESULT

All 64 current Approved records pass the implemented validator. Passing does not imply they satisfy the stronger planned rules above.

11 / SELECTABLE LIBRARY

Approved workout-record inventory

The current seed contains 70 records: 64 Approved and recommendation-eligible, 4 Draft, and 2 Archived. Every Approved record below passed the current implemented approval validator.

INVENTORY READING RULE

A record can support more than one event, level, or phase. Grouping below is for navigation only; the exact eventPathways, eventTags, athleteLevels, and seasonPhases shown on each record control eligibility.

60m / 100m

Meet Preparation

MEET-01 60/100 Pre-Meet Primer

Tier: developing, trained, advanced · Events: 60m, 100m · Phases: competition, taper
Pathway keys: short-sprint-100-200 · Duration: 40–55 min · Volume: 180 m total / 80 m high intensity

Purpose Rehearse starts and touch speed at minimal volume 24-48 hours before racing.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Block start: 1 sets × 2 reps · 20 m · 20 m fast zone · Fast and crisp; no fatigue chasing. · Rest: 4-5 min between starts | Fly 20: 1 sets × 2 reps · 40 m · 20 m fast zone · Fast and crisp; no fatigue chasing. · Rest: 6-8 min between flies · 20 m build-up + 20 m fly. | Relaxed 60 m build: 1 sets × 1 reps · 60 m · About 85%; optional. · Rest: Full recovery

Plyometrics Pogos: 2 sets × 5 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Fast and crisp; no fatigue chasing. **Rest** 4-5 min between starts; 6-8 min between flies.

Progression family meet-preparation · level 4 · regression — · progression — **Sources** R1

200m / 400m

Maximum Velocity

MAX-05 Curve-to-Straight Fly 20

Tier: trained, advanced · Events: 200m, 400m · Phases: specific-preparation, pre-competition, competition

Pathway keys: long-sprint-200-400 · Duration: 60–80 min · Volume: 280 m total / 80 m high intensity

Purpose Practice upright speed while exiting a curve into the straight.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal. | Progressive curve run: 1 sets × 2 reps · 30 m · Two progressive curve runs.

Sprint work Curve-to-straight fly: 1 sets × 4 reps · 70 m · 20 m fast zone · 95–100% in marked 20 m zone. · Rest: 6–8 min between reps · 30 m progressive curve build, 20 m fly across curve exit, 20 m smooth deceleration.

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95–100% in the marked 20 m zone. **Rest** 6–8 min between reps.

Progression family maximum-velocity · level 4 · regression — · progression — **Sources** R1, R2

Meet Preparation

MEET-02 200/400 Pre-Meet Primer

Tier: developing, trained, advanced · Events: 200m, 400m · Phases: competition, taper

Pathway keys: long-sprint-200-400 · Duration: 40–60 min · Volume: 180 m total / 60 m high intensity

Purpose Rehearse curve start and race rhythm at low volume 24–48 hours before racing.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal. | Relaxed curve build-up: 1 sets × 1 reps · 30 m

Sprint work Curve block start: 1 sets × 2 reps · 30 m · 30 m fast zone · Starts fast. · Rest: 5 min between starts | Controlled race-rhythm rep: 1 sets × 1 reps · 120 m · 85–92% depending on event and coach plan. · Rest: 8–10 min before rhythm rep · 80–120 m: 400 athlete may use 120 m, 200 athlete 80–100 m.

Plyometrics Pogos: 2 sets × 5 reps

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Starts fast; rhythm rep 85–92% depending on event and coach plan. **Rest** 5 min between starts; 8–10 min before rhythm rep.

Progression family meet-preparation · level 4 · regression — · progression — **Sources** R1, R2

Special Endurance

SPE-01 2 x 180 m Intro Special Endurance

Tier: trained, advanced · Events: 200m, 400m · Phases: specific-preparation

Pathway keys: long-sprint-200-400 · Duration: 70–90 min · Volume: 360 m total / 0 m high intensity

Purpose Introduce event-specific fatigue with restrained volume and long recovery.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 180 m standing start: 1 sets × 2 reps · 180 m · 90–95% according to phase and coach target. · Rest: 15–20 min between reps

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90–95% according to phase and coach target. **Rest** 15–20 min between reps.

Progression family special-endurance · level 4 · regression — · progression — **Sources** R1, R2

SPE-02 2 x 200 m Long-Sprint Quality

Tier: trained, advanced · Events: 200m, 400m · Phases: specific-preparation, pre-competition

Pathway keys: long-sprint-200-400 · Duration: 75–95 min · Volume: 400 m total / 0 m high intensity

Purpose Develop event-specific speed endurance with enough recovery to preserve execution.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 200 m in lane: 1 sets × 2 reps · 200 m · 90-95%; target from current controlled performance, not PR fantasy. · Rest: 15-25 min between reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90-95%; target from current controlled performance, not PR fantasy. **Rest** 15-25 min between reps.

Progression family special-endurance · level 4 · regression — · progression — **Sources** R1, R2

SPE-03 250 m + 150 m Split Session

Tier: advanced · Events: 400m · Phases: pre-competition, competition

Pathway keys: long-sprint-200-400 · Duration: 75-95 min · Volume: 400 m total / 0 m high intensity

Purpose Train 400-specific rhythm and a separate fast-finish exposure without pretending it is one race.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 250 m controlled fast: 1 sets × 1 reps · 250 m · Coach-defined event pace; not an uncontrolled time trial. · Rest: 20-30 min before 150 m | 150 m fast relaxed: 1 sets × 1 reps · 150 m · Coach-defined event pace; not an uncontrolled time trial. · Rest: Session complete

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Coach-defined event pace; neither rep is an uncontrolled time trial. **Rest** 20-30 min between reps.

Progression family special-endurance · level 4 · regression — · progression — **Sources** R1, R2

SPE-04 120 m + 80 m Race-Model Pair

Tier: trained, advanced · Events: 200m, 400m · Phases: pre-competition, competition

Pathway keys: long-sprint-200-400 · Duration: 65-85 min · Volume: 400 m total / 0 m high intensity

Purpose Practice rhythm changes and technical control in a split format.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 120 m race-model rep: 2 sets × 1 reps · 120 m · Prescribed fast rhythm. · Rest: 90 s to 3 min before 80 m | 80 m fast relaxed: 2 sets × 1 reps · 80 m · Fast relaxed quality, not survival effort. · Rest: 10-15 min between sets

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 120 m at prescribed fast rhythm; 80 m fast relaxed, not survival effort. **Rest** 90 s to 3 min between reps; 10-15 min between sets.

Progression family special-endurance · level 4 · regression — · progression — **Sources** R1, R2

Speed Endurance

SED-05 3 x 150 m Curve Rhythm

Tier: trained, advanced · Events: 200m, 400m · Phases: specific-preparation, pre-competition

Pathway keys: long-sprint-200-400 · Duration: 70-90 min · Volume: 450 m total / 0 m high intensity

Purpose Build 200/400 rhythm while holding mechanics through curve and straight.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal. | Relaxed curve build-up: 1 sets × 2 reps · 30 m

Sprint work 150 m curve rhythm: 1 sets × 3 reps · 150 m · 92-95%; prescribed split/rhythm rather than racing. · Rest: 10-15 min between reps · Curve mark into straight.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 92-95%; prescribed split/rhythm rather than racing. **Rest** 10-15 min between reps.

Starts

STA-02 Curve Start 30-60 m

Tier: trained, advanced · Events: 200m, 400m · Phases: specific-preparation, pre-competition, competition

Pathway keys: long-sprint-200-400 · Duration: 60–75 min · Volume: 240 m total / 240 m high intensity

Purpose Develop block clearance and acceleration that respects curve posture and lane geometry.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal. | Relaxed curve build-up: 1 sets × 2 reps · 30 m · Two relaxed curve build-ups.

Sprint work Curve block start: 1 sets × 2 reps · 30 m · 30 m fast zone · 95-100% with full control. · Rest: 4 min after 30 m | Curve start through transition: 1 sets × 3 reps · 60 m · 60 m fast zone · 95-100% with full control. · Rest: 6-8 min after 60 m

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100% with full control. **Rest** 4 min after 30 m; 6-8 min after 60 m.

Progression family starts · level 4 · regression — · progression — **Sources** R1, R2

Tempo Recovery

TEM-02 Grass 6 x 150 m Extensive Tempo

Tier: developing, trained, advanced · Events: 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: long-sprint-200-400 · Duration: 55–75 min · Volume: 900 m total / 0 m high intensity

Purpose Accumulate low-impact rhythm for long sprinters while keeping intensity below sprint work.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Sprint work 150 m extensive tempo: 1 sets × 6 reps · 150 m · About 65-75%; no straining or race splits. · Rest: 90 s to 2 min between reps

Strength Core and calf/tibialis circuit: 2 sets × 1 reps · Optional easy rounds.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity About 65-75%; no straining or race splits. **Rest** 90 s to 2 min between reps.

Football / 40-Yard

Combine Preparation

F40-ACC-01 40-Yard Acceleration Foundation

Tier: foundation, developing · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 45–60 min · Volume: 90 m total / 90 m high intensity

Purpose Practice a repeatable football stance, first movement, and continued acceleration through 20 yards.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Two-point or sport-stance start — 10 yd: 1 sets × 4 reps · 9 m · 9 m fast zone · 90-95%; fast and repeatable. · Rest: 2-3 min between reps · Distance stored as 9 m approximation; display and execute as 10 yards. | Two-point or sport-stance start — 20 yd: 1 sets × 3 reps · 18 m · 18 m fast zone · 90-95%; continue accelerating. · Rest: 3-4 min between reps · Distance stored as 18 m approximation; display and execute as 20 yards.

Plyometrics Standing broad jump: 3 sets × 2 reps · Before sprinting; full reset.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Quality start work, not repeated-sprint conditioning. Stop before the stance or first steps become inconsistent. **Rest** 3 min after 10-yard starts; 4-5 min after 20-yard starts.

F40-MAX-01 Football Upright-Speed Foundation

Tier: foundation, developing · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 50–65 min · Volume: 180 m total / 40 m high intensity

Purpose Introduce upright speed for the later portion of the 40-yard dash without repeated full testing.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Progressive build + fly 10 yd: 1 sets × 4 reps · 45 m · 10 m fast zone · 90-95%; relaxed and repeatable. · Rest: 5-7 min between reps · Use a gradual build, marked fast zone, and safe run-out.

Plyometrics Low pogos: 2 sets × 10 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90-95%. This is upright-speed practice, not repeated 40-yard testing. **Rest** 5-7 min between repetitions.

F40-ACC-03 Advanced 40-Yard Acceleration

Tier: advanced · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 55-75 min · Volume: 174 m total / 174 m high intensity

Purpose Challenge advanced 40-yard acceleration while preserving split quality and full recovery.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Competition start — 10 yd: 1 sets × 3 reps · 9 m · 9 m fast zone · 95-100%; standardized split setup. · Rest: 3 min between reps · Execute as 10 yards. | Competition start — 20 yd: 1 sets × 2 reps · 18 m · 18 m fast zone · 95-100%; connect projection to transition. · Rest: 4-5 min between reps · Execute as 20 yards. | Competition start — 40 yd: 1 sets × 3 reps · 37 m · 37 m fast zone · 95-100%; run through the finish. · Rest: 7-10 min between reps · Execute as 40 yards; testing is periodic rather than mandatory every week.

Plyometrics Broad jump series: 3 sets × 3 reps · High intent, low volume, full reset.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100%. Split quality and repeatability decide whether the final 40 is performed. **Rest** 3 min after 10 yd; 4-5 min after 20 yd; 7-10 min after 40 yd.

General Speed

Acceleration

GEN-ACC-01 General Acceleration Foundation

Tier: foundation, developing · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 45–60 min · Volume: 120 m total / 120 m high intensity

Purpose Build a repeatable linear-speed foundation with full-recovery accelerations rather than conditioning.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Standing or sport-stance acceleration — 10 m: 1 sets × 4 reps · 10 m · 10 m fast zone · 90-95%; fast and repeatable. · Rest: 2-3 min between reps | Standing or sport-stance acceleration — 20 m: 1 sets × 4 reps · 20 m · 20 m fast zone · 90-95%; fast and repeatable. · Rest: 3-4 min between reps

Plyometrics Standing broad jump: 3 sets × 2 reps · Full reset; stop when landing control drops.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity About 90-95%. Finish with the same positions and rhythm used on the first rep. **Rest** 3-4 min between accelerations; extend recovery when speed or technique is not repeatable.

GEN-ACC-02 General Acceleration Development

Tier: trained · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 50–65 min · Volume: 180 m total / 180 m high intensity

Purpose Develop longer, more forceful acceleration while preserving full recovery and repeatable mechanics.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Varied-start acceleration — 20 m: 1 sets × 3 reps · 20 m · 20 m fast zone · 95-100%; fast and technically repeatable. · Rest: 3-4 min between reps | Varied-start acceleration — 30 m: 1 sets × 4 reps · 30 m · 30 m fast zone · 95-100%; continue pushing through the transition. · Rest: 4-5 min between reps

Plyometrics Repeated broad jump: 3 sets × 3 reps · Reset between sets; stop if landing quality drops.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100% intent with full recovery. Quality, not fatigue, determines the useful volume. **Rest** 3-4 min after 20 m; 4-5 min after 30 m.

Progression family acceleration · level 3 · regression GEN-ACC-01 · progression GEN-ACC-03 **Sources** S2, S3, S7, S15

GEN-ACC-03 Advanced General Acceleration

Tier: advanced · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: short-sprint-100-200 · Duration: 55–70 min · Volume: 210 m total / 210 m high intensity

Purpose Challenge an advanced athlete across several acceleration distances without turning the session into conditioning.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Competition-stance acceleration — 20 m: 1 sets × 2 reps · 20 m · 20 m fast zone · 95-100%; precise first steps. · Rest: 3-4 min between reps | Competition-stance acceleration — 30 m: 1 sets × 3 reps · 30 m · 30 m fast zone · 95-100%; maintain projection into transition. · Rest: 4-5 min between reps | Extended acceleration — 40 m: 1 sets × 2 reps · 40 m · 40 m fast zone · 95-100%; smooth rise into upright running. · Rest: 5-6 min between reps

Plyometrics Bound or horizontal jump series: 3 sets × 4 reps · Low volume, full reset, stable landings.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100% intent. Stop the distance ladder when speed or positions are no longer repeatable. **Rest** 3-4 min after 20 m; 4-5 min after 30 m; 5-6 min after 40 m.

GEN-COURT-ACC-01 Limited-Space Acceleration Foundation

Tier: foundation, developing, trained, advanced · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition, competition
 Pathway keys: short-sprint-100-200 · Duration: 35–50 min · Volume: 80 m total / 80 m high intensity

Purpose Train first-step and short acceleration when a court or short indoor lane is the only realistic space.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Sport-stance start: 1 sets × 4 reps · 10 m · 10 m fast zone · 90-95%; stop well before the boundary. · Rest: 2-3 min between reps | Two-point acceleration: 1 sets × 4 reps · 10 m · 10 m fast zone · 90-95%; clean first steps. · Rest: 2-3 min between reps

Plyometrics Snap-down + broad jump: 3 sets × 2 reps · Land under control with a full reset.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Short, crisp acceleration only. This session does not pretend a court supplies true maximum-velocity exposure. **Rest** 2-3 min between starts.

Progression family acceleration · level 4 · regression — · progression — **Sources** S2, S3, S7, S16

GEN-INTEGRATE-01 General Speed Acceleration Integration

Tier: trained, advanced · Events: 100m · Phases: general-preparation, specific-preparation
 Pathway keys: short-sprint-100-200 · Duration: 45–60 min · Volume: 150 m total / 150 m high intensity

Purpose Add an optional third linear-speed exposure for trained athletes without duplicating either primary quality day.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Smooth 30 m acceleration: 1 sets × 5 reps · 30 m · 30 m fast zone · 90-95%; technical and repeatable rather than maximal. · Rest: 4-5 min between reps

Plyometrics Low horizontal jump: 3 sets × 2 reps · Full reset between efforts.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90-95%. This is a third exposure, so it must not become the hardest session of the week. **Rest** 4-5 min between accelerations.

GEN-MICRO-01 In-Season Linear Speed Microdose

Tier: foundation, developing, trained, advanced · Events: 100m · Phases: competition

Pathway keys: short-sprint-100-200 · Duration: 35–50 min · Volume: 180 m total / 90 m high intensity

Purpose Maintain acceleration and upright-speed exposure with minimal in-season volume.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Brief acceleration: 1 sets × 3 reps · 20 m · 20 m fast zone · 90-95%; crisp, not draining. · Rest: 3-4 min between reps | Progressive fly 10 m: 1 sets × 3 reps · 40 m · 10 m fast zone · 90-95%; relaxed upright exposure. · Rest: 5-6 min between reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Brief, fast, and repeatable; accessory volume stays low. **Rest** 3-4 min after accelerations; 5-6 min after flies.

Tempo Recovery

GEN-LOW-01 General Speed Low Support Day

Tier: foundation, developing, trained, advanced · Events: 100m · Phases: general-preparation, specific-preparation, pre-competition, competition, transition

Pathway keys: short-sprint-100-200 · Duration: 35–50 min · Volume: 360 m total / 0 m high intensity

Purpose Keep a support day genuinely low while building rhythm, trunk capacity, and lower-leg strength.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Sprint work Relaxed stride: 1 sets × 6 reps · 60 m · 65-75%; conversational and smooth. · Rest: Walk-back recovery

Strength Lower-leg + trunk circuit: 2 sets × 1 reps · Calf raise, bent-knee soleus raise, tibialis raise, dead bug, and side plank.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 65-75% strides and easy support work. This is not hidden sprint conditioning. **Rest** Walk back fully after strides; 45-75 s between circuit movements.

Shared / Support

Acceleration

ACC-04 Short Hill Acceleration

Tier: developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 50–70 min · Volume: 120 m total / 120 m high intensity

Purpose Use a short hill to reinforce horizontal force and patient projection.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Short hill acceleration: 1 sets × 6 reps · 20 m · 20 m fast zone · 90–95%; controlled hill acceleration. · Rest: 3–4 min walk-back/full recovery · Use a moderate, even hill; do not use downhill.

Plyometrics Pogos: 2 sets × 10 reps

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90–95%; never sprint a steep, uneven, wet, or traffic-exposed hill. **Rest** 3–4 min, with a full walk-back.

Progression family acceleration · level 1 · regression — · progression — **Sources** R1, R3

ACC-01 Wall Drill + 10 m Start Foundation

Tier: foundation, developing · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 45–60 min · Volume: 80 m total / 0 m high intensity

Purpose Build safe projection and first-step positions before longer acceleration.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Falling start: 1 sets × 4 reps · 10 m · 90–95%; deliberate projection. · Rest: 2 min between reps | Two-point start: 1 sets × 4 reps · 10 m · 90–95%; deliberate projection. · Rest: 2 min between reps

Plyometrics Low pogos: 2 sets × 10 reps · Low contacts before sprinting.

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 90–95%; deliberate projection, not maximal straining. **Rest** 2 min between starts.

ACC-02 Falling Start 20s

Tier: developing, trained · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 50–65 min · Volume: 120 m total / 120 m high intensity

Purpose Develop repeatable falling-start acceleration over 20 m.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Falling start: 1 sets × 6 reps · 20 m · 20 m fast zone · 95–100% intent. · Rest: 3 min between reps

Plyometrics Pogos: 2 sets × 10 reps

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95–100% intent. **Rest** 3 min between reps.

Progression family acceleration · level 3 · regression ACC-01 · progression ACC-06 **Sources** R1, R4

ACC-03 Three-Point 30 m Quality

Tier: trained, advanced · Events: 60m, 100m, 200m · Phases: specific-preparation, pre-competition

Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 55–70 min · Volume: 140 m total / 140 m high intensity

Purpose Extend start quality into a 30 m acceleration.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Three-point start: 1 sets × 2 reps · 10 m · 10 m fast zone · 95-100% intent · Rest: 3 min between reps | Three-point start: 1 sets × 4 reps · 30 m · 30 m fast zone · 95-100% intent · Rest: 4-5 min between reps

Plyometrics Broad jump: 3 sets × 2 reps · Before sprinting; land under control.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100% intent; every rep should look like the first. **Rest** 3 min after 10 m; 4-5 min after 30 m.

Progression family acceleration · level 4 · regression — · progression — **Sources** R1, R4

ACC-05 Light Sled ♦ Free Sprint Contrast

Tier: trained, advanced · Events: 60m, 100m, 200m · Phases: general-preparation, specific-preparation
 Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 55–75 min · Volume: 120 m total / 120 m high intensity

Purpose Pair technically sound resisted accelerations with normal accelerations.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Sled sprint: 3 sets × 1 reps · 20 m · 20 m fast zone · Coach-observed mechanics or measured velocity decrement; no prescribed load. · Rest: 2-3 min before free sprint | Free sprint contrast: 3 sets × 1 reps · 20 m · 20 m fast zone · 95-100%. · Rest: 5-6 min between sets

Plyometrics Broad jump: 3 sets × 3 reps · Before the sprint set, not after fatigue.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Light-to-moderate resistance selected by mechanics; free reps 95-100%. **Rest** 2-3 min sled to free; 5-6 min between sets.

Progression family acceleration · level 4 · regression — · progression — **Sources** R1, R3

ACC-06 Mixed 20-30-40 m Acceleration

Tier: trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: specific-preparation, pre-competition
 Pathway keys: shared · Duration: 60–75 min · Volume: 180 m total / 180 m high intensity

Purpose Extend acceleration while preserving one repeatable start pattern.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Event-relevant start: 1 sets × 2 reps · 20 m · 20 m fast zone · 95-100% intent · Rest: 3 min after 20 m | Event-relevant start: 1 sets × 2 reps · 30 m · 30 m fast zone · 95-100% intent · Rest: 4 min after 30 m | Event-relevant start: 1 sets × 2 reps · 40 m · 40 m fast zone · 95-100% intent · Rest: 5-6 min after 40 m

Plyometrics Pogos: 2 sets × 10 reps | Horizontal jump: 3 sets × 2 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95-100% intent; quality is more important than all six reps. **Rest** 3 min after 20 m; 4 min after 30 m; 5-6 min after 40 m.

Core Bodyweight

CORE-01 Rotisserie Chicken 8-Minute Circuit

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition, competition, transition
 Pathway keys: shared · Duration: 8–9 min · Volume: 0 m total / 0 m high intensity

Purpose Build short, repeatable trunk and bodyweight capacity by alternating face-down and face-up positions.

Warm-up Easy movement and rehearsal: 90 s · 60-90 s easy movement plus one gentle rehearsal of the first two exercises.

Core / bodyweight High-plank shoulder taps: 40 s · Face down; 10 s to flip/reset. | Dead bug: 40 s · Face up; 10 s to flip/reset. | Push-up or elevated push-up: 40 s · Face down; 10 s to flip/reset. | Bicycle or alternating heel taps: 40 s · Face up; 10 s to flip/reset. | Plank walkouts: 40 s · Face down; 10 s to flip/reset. | Glute-bridge march: 40 s · Face up; 10 s to flip/reset. | Forearm plank knee taps: 40 s · Face down; 10 s to flip/reset. | Bent-knee hollow or dead-bug hold: 40 s · Face up; 10 s to flip/reset. | Slow mountain climbers: 40 s · Face down; 10 s to flip/reset. | Reverse crunch or single-leg lowering: 40 s · Face up; final station.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity RPE 5-7/10; clean positions, never frantic. **Rest** 10 s between stations. No extra round is added automatically.

CORE-02 Bodyweight Athletic Basics

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, transition
 Pathway keys: shared · Duration: 20–30 min · Volume: 0 m total / 0 m high intensity

Purpose Build basic push, pull, squat, split-stance, bridge, calf, and trunk capacity with simple progressions.

Warm-up Athletic basics warm-up: 5 min · 5 min easy movement; dynamic hip/ankle mobility; trunk and glute activation.

Core / bodyweight Squat: 3 sets × 12 reps · 2-3 rounds; 8-12 reps. | Reverse lunge: 3 sets × 6 reps · Per side. | Push-up: 3 sets × 12 reps · 6-12 reps. | Pull-up or band row: 3 sets × 8 reps · Pull-up 3-8 or band row 8-12. | Single-leg bridge: 3 sets × 8 reps · Per side. | Calf raise: 3 sets × 15 reps | Side plank: 3 sets × 30 s · 20-30 s per side.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity RPE 5-7/10; finish every set with 2-3 clean reps still available. **Rest** 30-45 s between movements; 90 s between rounds.

Progression family core-bodyweight · level 4 · regression — · progression — **Sources** R6, R14, R16

Maximum Velocity**MAX-01 Wicket Rhythm + Fly 10**

Tier: foundation, developing · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation
 Pathway keys: shared · Duration: 55–70 min · Volume: 220 m total / 40 m high intensity

Purpose Introduce upright rhythm and a short measured fast zone.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Wicket run: 1 sets × 4 reps · 30 m · Submaximal technical rhythm. · Rest: 2-3 min between runs · 20-30 m wicket run; catalogue volume uses 30 m. | Fly 10: 1 sets × 4 reps · 25 m · 10 m fast zone · About 95% through 10 m fly zone. · Rest: 4 min between flies · 20-25 m build-up + 10 m fly.

Plyometrics Low pogos: 2 sets × 10 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Wickets submaximal and precise; fly zone about 95%, never forced. **Rest** 2-3 min after wickets; 4 min after flies.

Plyometrics

PLY-01 Landing ♦ Pogo Foundation

Tier: foundation, developing · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 35–50 min · Volume: 0 m total / 0 m high intensity

Purpose Build landing control and low-level stiffness before advanced reactive work.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Snap-down to stick: 3 sets × 3 reps | Bilateral pogo: 3 sets × 10 reps | Line hop: 2 sets × 8 reps · Each direction. | Low box jump: 3 sets × 2 reps

Strength Calf/tibialis circuit: completion item · Optional and easy.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Submaximal-to-crisp; every landing controlled. **Rest** 45-90 s between sets; full reset for box jumps.

Progression family plyometrics · level 2 · regression — · progression — **Sources** R1, R7

PLY-02 Horizontal Elasticity

Tier: developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 45–60 min · Volume: 0 m total / 0 m high intensity

Purpose Develop horizontal projection and reactive contacts at low volume.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Pogo: 2 sets × 10 reps | Broad jump: 3 sets × 2 reps | Alternate bounds: 3 sets × 1 reps · 20 m | Low hurdle hop: 3 sets × 4 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity High quality, low fatigue; stop when contacts slow. **Rest** 60-120 s between low contacts; 2-3 min between bounds/jumps.

Progression family plyometrics · level 4 · regression — · progression — **Sources** R1, R7

PLY-03 Vertical Jump + Hurdle-Hop Quality

Tier: developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 25–40 min · Volume: 0 m total / 0 m high intensity

Purpose Develop vertical force, landing control, and quick bilateral contacts with low total volume.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Snap-down to stick: 2 sets × 3 reps | Countermovement jump: 3 sets × 3 reps | Low hurdle hop: 3 sets × 4 reps | Pogo: 2 sets × 10 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Every rep is crisp; hurdle height stays low enough to preserve contact quality. **Rest** 60-90 s between low-contact sets; 2-3 min between maximal jumps.

Progression family plyometrics · level 4 · regression — · progression — **Sources** R13, R14, R15

PLY-04 Bounds + Single-Leg Projection

Tier: trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 30–45 min · Volume: 0 m total / 0 m high intensity

Purpose Develop horizontal projection and single-leg elastic control without chasing fatigue.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Pogo: 2 sets × 10 reps | Single-leg hop and stick: 2 sets × 3 reps · Per side. | Straight-leg bound: 3 sets × 1 reps · 20 m | Alternate bound: 3 sets × 1 reps · 20 m

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity High quality and submaximal-to-fast; distance never outranks posture. **Rest** 60-90 s after hop-and-stick; 2-3 min between bound reps.

Progression family plyometrics · level 4 · regression — · progression — **Sources** R1, R13, R14

Tier: developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation

Pathway keys: shared · Duration: 25–40 min · Volume: 0 m total / 0 m high intensity

Purpose Develop low-volume horizontal power that supports projection during acceleration.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Snap-down to stick: 2 sets × 3 reps | Standing broad jump: 4 sets × 2 reps | Split-stance jump: 3 sets × 3 reps · Per side. | Low box jump: 3 sets × 2 reps

Strength Optional calf and tibialis raises: 2 sets × 15 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Powerful but repeatable; every landing is quiet and balanced. **Rest** 60-90 s between snap-down/split-jump sets; 2-3 min between broad and box jumps.

Progression family plyometrics · level 4 · regression — · progression — **Sources** R13, R14, R15

PLY-06 Max-Velocity Elasticity Microdose

Tier: trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition

Pathway keys: shared · Duration: 15–25 min · Volume: 0 m total / 0 m high intensity

Purpose Provide a small dose of fast elastic contacts that can accompany an upright-speed day.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Plyometrics Bilateral pogo: 2 sets × 10 reps | Low hurdle hop: 3 sets × 4 reps | Straight-leg bound: 2 sets × 1 reps · 20 m

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Crisp and low volume; stop before contact time, posture, or rhythm deteriorates. **Rest** 60-90 s between pogo/hurdle sets; 2-3 min between bounds.

Progression family plyometrics · level 4 · regression — · progression — **Sources** R13, R15

PLY-07 Grass Elasticity Fundamentals

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, transition

Pathway keys: shared · Duration: 20–30 min · Volume: 0 m total / 0 m high intensity

Purpose Build basic ankle rhythm, landing control, and low-impact jumping competency on a forgiving surface.

Warm-up Grass elasticity warm-up: 10 min · 5 min easy movement; ankle rocks; marching; skipping; two relaxed build-ups.

Plyometrics Jump rope or ankle bounce: 3 sets × 20 s | Snap-down to stick: 3 sets × 3 reps | Pogo: 3 sets × 8 reps | Skipping for height: 3 sets × 1 reps · 20 m | Broad jump and stick: 3 sets × 2 reps

Strength Optional tibialis and bent-knee calf raise: 2 sets × 15 reps

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity RPE 4-6/10; low contacts and clean landings. **Rest** 45-75 s between low-contact sets; 2 min between broad jumps.

Speed Endurance

SED-01 Two Sets of 3 x 60 m

Tier: developing, trained · Events: 60m, 100m, 200m · Phases: general-preparation, specific-preparation

Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 60–80 min · Volume: 360 m total / 0 m high intensity

Purpose Accumulate controlled fast running while preserving upright mechanics.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4-6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Standing-start 60 m: 2 sets × 3 reps · 60 m · 92-95%; repeatable and relaxed. · Rest: 3 min between reps; 8 min between sets

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 92-95%; repeatable and relaxed. **Rest** 3 min between reps; 8 min between sets.

Progression family speed-endurance · level 3 · regression — · progression — **Sources** R1

SED-03 4 x 100 m Full-Recovery Speed Endurance

Tier: developing, trained · Events: 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition
 Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 70–90 min · Volume: 400 m total / 400 m high intensity

Purpose Train the ability to hold a high fraction of speed with full recovery.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 100 m full-recovery sprint: 1 sets × 4 reps · 100 m · 100 m fast zone · 95%; quality-controlled. · Rest: 8–12 min between reps · Standing or three-point start.

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 95%; quality-controlled. **Rest** 8–12 min between reps.

Progression family speed-endurance · level 3 · regression — · progression SED-04 **Sources** R1

SED-02 Two Sets of 3 x 80 m

Tier: trained, advanced · Events: 100m, 200m · Phases: specific-preparation, pre-competition
 Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 70–90 min · Volume: 480 m total / 0 m high intensity

Purpose Extend fast relaxed sprinting past the initial acceleration phase.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 80 m repeat: 2 sets × 3 reps · 80 m · 93–95%, controlled. · Rest: 4 min between reps; 10 min between sets

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 93–95%, controlled. **Rest** 4 min between reps; 10 min between sets.

SED-04 3 x 120 m Relaxed Fast

Tier: trained, advanced · Events: 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition
 Pathway keys: short-sprint-100-200, long-sprint-200-400 · Duration: 65–85 min · Volume: 360 m total / 360 m high intensity

Purpose Develop late-rep mechanics and speed maintenance over 120 m.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work 120 m relaxed-fast: 1 sets × 3 reps · 120 m · 120 m fast zone · 92–95%; never an all-out time trial. · Rest: 10–15 min between reps · One rep may be curve-to-straight for 200/400 athletes.

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity 92–95%; never converted into an all-out time trial. **Rest** 10–15 min between reps.

Starts

STA-01 Block Start Setup + 10-20 m

Tier: developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: specific-preparation, pre-competition, competition
 Pathway keys: shared · Duration: 50–65 min · Volume: 110 m total / 110 m high intensity

Purpose Practice repeatable block setup, set position, and first-step execution.

Warm-up RAMP sprint warm-up: 15 min · Raise: 4–6 min easy movement. Mobilize: ankle rocks, leg swings, hip circles, walking lunge. Activate: glute bridge, band walk if available, A-march/A-skip, wall-switch drill. Potentiate: 2 x 30 m build-ups (about 60%, then 75%) and 1 x 20 m at about 85%; add one event-specific rehearsal.

Sprint work Block clearance: 1 sets × 3 reps · 10 m · 10 m fast zone · Fast and precise. · Rest: 2–3 min after 10 m | Block start: 1 sets × 4 reps · 20 m · 20 m fast zone · Fast and precise. · Rest: 3–5 min after 20 m

Cooldown Easy downshift: 5 min · 3–8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Fast and precise; not conditioning. **Rest** 2–3 min after 10 m; 3–5 min after 20 m.

Strength

STR-01 Force-Oriented Sprint Strength

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition
Pathway keys: shared · Duration: 50–70 min · Volume: 0 m total / 0 m high intensity

Purpose Develop force with a complete foundational lift: explosive work, squat or trap-bar pattern, hinge, unilateral strength, upper-body push and pull, and trunk.

Warm-up Strength warm-up: 10 min · Easy movement, dynamic hip/ankle mobility, trunk and glute activation, then progressive technique sets.

Plyometrics Box jump or broad jump: 3 sets × 3 reps · Full reset between quality reps. Beginners use a low box or controlled broad jump.

Strength Back squat or trap-bar deadlift: 4 sets × 5 reps · 3-4 sets of 3-6 controlled reps. Beginners use fewer sets and lighter loading. | Barbell or dumbbell RDL: 3 sets × 6 reps · 2-4 sets of 5-8. | Loaded split squat: 3 sets × 6 reps · 2-3 sets of 5-8 per side. | Bench press or dumbbell bench press: 3 sets × 8 reps · 2-4 sets of 5-10. | Pull-up, pulldown, or row: 3 sets × 8 reps · 2-4 sets of 5-10. | Loaded trunk circuit: 2 sets × 8 min · 2-3 sets or 6-10 minutes.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Use a controlled load that preserves positions. Beginners leave 3 good reps in reserve; trained athletes usually leave 1-3. **Rest** 2-4 min for primary lifts; 60-120 s for accessories.

Progression family strength · level 4 · regression — · progression — **Sources** R5, R6, R7

STR-02 Explosive Sprint Strength

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition
Pathway keys: shared · Duration: 45–65 min · Volume: 0 m total / 0 m high intensity

Purpose Develop explosive strength while maintaining the same complete squat/hinge/push/pull/trunk foundation.

Warm-up Strength warm-up: 10 min · Easy movement, dynamic mobility, landing rehearsal, then progressive technique sets.

Plyometrics Jump, throw, clean pull, or trap-bar jump: 4 sets × 3 reps · 3-5 sets of 2-5 quality reps. Use pogos, broad jumps, or box jumps when simpler execution is appropriate.

Strength Front squat or trap-bar deadlift: 3 sets × 5 reps · 3-4 sets of 3-6 controlled reps. | Hip thrust or RDL: 3 sets × 6 reps · 2-4 sets of 5-8. | Bulgarian split squat: 2 sets × 6 reps · Per side. | Bench press or overhead press: 3 sets × 8 reps | Pull-up or row: 3 sets × 8 reps | Trunk or durability circuit: 2 sets × 8 min · 6-10 minutes.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Explosive reps stay crisp. Loaded work remains controlled and stops before bar speed or technique deteriorates. **Rest** 2-4 min for explosive and primary lifts; 60-120 s for accessories.

Progression family strength · level 4 · regression — · progression — **Sources** R1, R5, R6

STR-03 No-Gym Athletic Strength

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, transition
Pathway keys: shared · Duration: 35–55 min · Volume: 0 m total / 0 m high intensity

Purpose Develop relative strength, single-leg control, trunk capacity, and posture with minimal equipment.

Warm-up Strength warm-up: 10 min · 5 min easy movement; dynamic hip/ankle mobility; trunk and glute activation.

Plyometrics Pogos: 2 sets × 10 reps · Only when fresh.

Strength Split squat: 3 sets × 6 reps · Per side. | Single-leg bridge: 3 sets × 8 reps · Per side. | Slow hamstring walkout: 2 sets × 5 reps | Push-up: 3 sets · Quality sets. | Pull-up or band row: 3 sets | Calf raise: 2 sets × 12 reps | Dead bug: 2 sets × 8 reps · Per side.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Controlled; stop 2-3 reps before technical failure. **Rest** 60-120 s between sets.

Progression family strength · level 4 · regression — · progression — **Sources** R6, R7, R9

STR-04 Posterior Chain ♦ Lower-Leg Strength

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation
Pathway keys: shared · Duration: 40–60 min · Volume: 0 m total / 0 m high intensity

Purpose Build the hamstrings, hips, calves, soleus, and tibialis without creating soreness that ruins sprint quality.

Warm-up Strength warm-up: 10 min · 5 min easy movement; dynamic hip/ankle mobility; trunk and glute activation; 2-4 progressively heavier technique sets for the first lift.

Plyometrics Low pogos: 2 sets × 10 reps · Only when the lower legs are fresh.

Strength RDL: 3 sets × 6 reps · 5-6 reps. | Hip thrust or long-lever bridge: 3 sets × 8 reps · 6-8 reps. | Hamstring slider: 2 sets × 6 reps · 5-6 reps. | Straight-knee calf raise: 2 sets × 10 reps | Bent-knee soleus raise: 2 sets × 10 reps | Tibialis raise: 2 sets × 15 reps

Core / bodyweight Copenhagen plank: 2 sets × 25 s · 15-25 s per side.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Leave 2-3 clean repetitions in reserve. Eccentrics are controlled, never forced. **Rest** 2-3 min after RDL/hip thrust; 60-90 s for accessories.

Progression family strength · level 4 · regression — · progression — **Sources** R5, R6, R9, R15

STR-05 Unilateral Sprint Strength

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, pre-competition
Pathway keys: shared · Duration: 40–60 min · Volume: 0 m total / 0 m high intensity

Purpose Develop single-leg force, pelvic control, and upper-body posture with moderate total volume.

Warm-up Strength warm-up: 10 min · 5 min easy movement; dynamic hip/ankle mobility; trunk and glute activation; 2-4 progressively heavier technique sets for the first lift.

Plyometrics Standing broad jump: 3 sets × 2 reps · Before lifting; full reset.

Strength Bulgarian split squat: 3 sets × 5 reps · Per side. | Step-up: 2 sets × 5 reps · Per side. | Single-leg RDL: 2 sets × 6 reps · Per side. | Pull-up or row: 3 sets · Quality sets. | Push-up or dumbbell bench: 3 sets × 10 reps · 6-10 reps.

Core / bodyweight Pallof press: 2 sets × 8 reps · Per side.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Controlled lowering and fast clean intent upward; never grind. **Rest** 2-3 min for split squats; 60-120 s for remaining work.

Tempo Recovery

TEM-01 Grass 10 x 100 m Extensive Tempo

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, competition
Pathway keys: shared · Duration: 50–70 min · Volume: 1000 m total / 0 m high intensity

Purpose Build low-intensity rhythm and circulation without turning the day into a hidden hard session.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Sprint work 100 m extensive tempo: 2 sets × 5 reps · 100 m · About 65-70%; conversational and mechanically easy. · Rest: Walk 50 m or 45-60 s; 3 min between sets

Plyometrics Low pogos: 2 sets × 10 reps · Optional only if fresh.

Strength Easy trunk circuit: 10 min · Optional 8-10 min easy trunk circuit.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity About 65-70%; conversational and mechanically easy. **Rest** Walk 50 m or 45-60 s; 3 min between sets.

TEM-03 Technical Low Day ♦ Strides

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, competition
Pathway keys: shared · Duration: 45–60 min · Volume: 360 m total / 0 m high intensity

Purpose Keep a low day productive through mobility, drill quality, and non-maximal strides.

Warm-up Low-day warm-up: 10 min · 5 min easy movement; dynamic ankle/hip mobility; marching, skipping, and two progressive strides that remain comfortably submaximal.

Sprint work Wall switches: 2 sets × 5 reps · Per leg; technical, not exhausting. | A-march/A-skip: 2 sets × 1 reps · 20 m · Technical drill. | 60 m stride: 1 sets × 6 reps · 60 m · 65-75%; low effort. · Rest: Walk-back recovery

Plyometrics Low pogos: 2 sets × 10 reps · Only if symptom-free.

Strength Trunk/hip circuit: 8 min

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity Strides 65-75%; drills technical, not exhausting. **Rest** Walk back after strides; 45-75 s between drill reps.

TEM-04 Pool/Bike Recovery Circuit

Tier: foundation, developing, trained, advanced · Events: 60m, 100m, 200m, 400m · Phases: general-preparation, specific-preparation, competition, transition

Pathway keys: shared · Duration: 30–45 min · Volume: 0 m total / 0 m high intensity

Purpose Provide a non-impact recovery option when movement is useful but running is not suitable.

Warm-up Easy bike or pool movement: 5 min

Sprint work Easy-moderate cadence interval: 1 sets × 8 reps · 30 s · RPE 3-5/10; never a disguised maximal interval session. · Rest: 60 s very easy between work bouts. · Use 8-12 repetitions; pool option is smooth water running.

Strength Easy mobility and trunk work: completion item · Optional.

Cooldown Easy downshift: 5 min · 3-8 min easy walk, breathing downshift, then brief comfortable mobility. Long static stretching is optional after the session, never forced.

Intensity RPE 3-5/10; never a disguised maximal interval session. **Rest** 60 s very easy between work bouts.

12 / REGRESSION MATRIX

Verified profile behavior

The following results were generated from the real selector on July 30, 2026. Normal profiles were healthy, general-preparation/offseason, normally recovered, had no competition that week, and used exact Monday/Wednesday/Friday or Monday/Tuesday/Wednesday/Friday/Saturday availability. Reduced-readiness profiles set currentPain=true.

60m/100m

Inputs	Expected structure	Selected IDs	Result	Reason
beginner; 3 available days; general-preparation; readiness normal	Acceleration; upright speed; one low/support day; explosive work; two foundational strength pairings.	GEN-ACC-01+STR-01 TEM-01 MAX-01+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
beginner; 5 available days; general-preparation; readiness normal	Acceleration; upright speed; two low/support days; elastic power; meaningful strength.	GEN-ACC-01+STR-01 TEM-01 MAX-01+STR-02 TEM-03 PLY-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 3 available days; general-preparation; readiness normal	Acceleration; low support; maximum velocity; paired strength.	ACC-02+STR-01 TEM-01 MAX-02+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 5 available days; general-preparation; readiness normal	Three high-output roles, two lower-output roles, and two strength pairings.	ACC-02+STR-01 TEM-01 MAX-02+STR-02 TEM-03 SED-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
advanced; 5 available days; general-preparation; readiness normal	Advanced short-sprint week with acceleration, max velocity, speed endurance, support, and strength.	GEN-ACC-03+STR-01 TEM-01 MAX-02+STR-02 TEM-03 SED-04	QUESTIONABLE	Structure is coherent, but it mixes a general-speed acceleration record with shared track records.
advanced; 5 available days; general-preparation; readiness reduced	One reviewed tier lower than the otherwise supported advanced week, with the reason displayed.	GEN-ACC-03+STR-01 TEM-01 MAX-02+STR-02 TEM-03 SED-04	FAIL	Track pathway returned the same advanced week; weekly tier regression is not applied.
intermediate; 3 available days; competition; readiness normal	Competition-appropriate microdoses/support around competition load; no blind stacking.	GEN-COURT-ACC-01 TEM-03 MAX-06	QUESTIONABLE	Three-role competition week is complete, but a court/limited-space acceleration record is selected for a track profile.

beginner; 3 available days; general-preparation; readiness normal	Acceleration; introductory upright speed; support; explosive work; foundational strength.	ACC-01+STR-01 TEM-01 MAX-01+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
beginner; 5 available days; general-preparation; readiness normal	Acceleration; upright speed; two support days; elastic power; meaningful strength.	ACC-01+STR-01 TEM-01 MAX-01+STR-02 TEM-03 PLY-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 3 available days; general-preparation; readiness normal	Acceleration; tempo support; maximum velocity; paired strength.	ACC-04+STR-01 TEM-02 MAX-02+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 5 available days; general-preparation; readiness normal	Acceleration; max velocity; controlled speed endurance; two support roles; strength.	ACC-04+STR-01 TEM-02 MAX-02+STR-02 TEM-03 SED-04	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.

Inputs	Expected structure	Selected IDs	Result	Reason
advanced; 5 available days; general-preparation; readiness normal	Advanced long-sprint week with distinct progression and event-specific loading.	ACC-04+STR-01 TEM-02 MAX-02+STR-02 TEM-03 SED-04	QUESTIONABLE	Structure is coherent, but selected IDs are identical to trained and no distinct advanced long-sprint tier is expressed.
advanced; 5 available days; general-preparation; readiness reduced	One reviewed tier lower than the otherwise supported advanced week, with the reason displayed.	ACC-04+STR-01 TEM-02 MAX-02+STR-02 TEM-03 SED-04	FAIL	Track pathway returned the same advanced week; weekly tier regression is not applied.
intermediate; 3 available days; competition; readiness normal	Competition-appropriate microdoses/support around competition load; no blind stacking.	STA-01 TEM-03 MAX-06	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.

Football/40-Yard

Inputs	Expected structure	Selected IDs	Result	Reason
beginner; 3 available days; general-preparation; readiness normal	Simple starts/acceleration; upright speed; support; explosive and foundational strength.	F40-ACC-01+STR-01 GEN-LOW-01 F40-MAX-01+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
beginner; 5 available days; general-preparation; readiness normal	Two quality speed exposures; two support roles; elastic work; two strength pairings.	F40-ACC-01+STR-01 GEN-LOW-01 F40-MAX-01+STR-02 CORE-02 PLY-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 3 available days; general-preparation; readiness normal	Trained 40-yard acceleration, support, upright speed, and strength.	F40-ACC-02+STR-01 GEN-LOW-01 F40-MAX-02+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 5 available days; general-preparation; readiness normal	Three quality 40-yard roles, two support roles, and two strength pairings.	F40-ACC-02+STR-01 GEN-LOW-01 F40-MAX-02+STR-02 CORE-02 F40-TRANSFER-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
advanced; 5 available days; general-preparation; readiness normal	Advanced acceleration/upright tiers, transfer exposure, support, and strength.	F40-ACC-03+STR-01 GEN-LOW-01 F40-MAX-03+STR-02 CORE-02 F40-TRANSFER-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
advanced; 5 available days; general-preparation; readiness reduced	One reviewed tier lower than the otherwise supported advanced week, with the reason displayed.	F40-ACC-02+STR-01 GEN-LOW-01 F40-MAX-02+STR-02 CORE-02 F40-TRANSFER-01	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
intermediate; 6 available days; competition; readiness normal	Competition-appropriate microdoses/support around competition load; no blind stacking.	GEN-MICRO-01 GEN-LOW-01 CORE-01	QUESTIONABLE	Practice/game blocking works, but the remaining three sessions contain no meaningful loaded-strength exposure.

General Speed

Inputs	Expected structure	Selected IDs	Result	Reason
beginner; 3 available days; general-preparation; readiness normal	Simple acceleration, upright speed, mechanics/support, explosive work, and strength.	GEN-ACC-01+STR-01 GEN-LOW-01 GEN-MAX-01+STR-02	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.

Competition and schedule-load cases

Profile	Expected	Selected IDs	Result	Reason
Competition 60m/100m — 3 days	Competition-appropriate microdoses/support around competition load; no blind stacking.	GEN-COURT-ACC-01, TEM-03, MAX-06	QUESTIONABLE	Three-role competition week is complete, but a court/limited-space acceleration record is selected for a track profile.
Competition 200m/400m — 3 days	Competition-appropriate microdoses/support around competition load; no blind stacking.	STA-01, TEM-03, MAX-06	PASS	The generated week contains the expected pathway qualities, support structure, and explained open days.
In-season Football with Tue/Thu practices and Sat game	Competition-appropriate microdoses/support around competition load; no blind stacking.	GEN-MICRO-01, GEN-LOW-01, CORE-01	QUESTIONABLE	Practice/game blocking works, but the remaining three sessions contain no meaningful loaded-strength exposure.
In-season General Speed with Tue/Thu practices and Sat game	Competition-appropriate microdoses/support around competition load; no blind stacking.	GEN-MICRO-01, GEN-LOW-01, CORE-01	QUESTIONABLE	Practice/game blocking works, but the remaining three sessions contain no meaningful loaded-strength exposure.

Complete generated outputs

These compact traces preserve the complete selected week: day index, planned-workout ID/title, sprint work, explosive work, strength, and support components. Open days are represented in the seven-day schedule as explained rest/open days.

BEGINNER 60M/100M — 3 DAYS

- 1 · GEN-ACC-01+STR-01 · General Acceleration Foundation + Force-Oriented Sprint Strength | Sprint: Standing or sport-stance acceleration — 10 m; Standing or sport-stance acceleration — 20 m | Explosive: Standing broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 3 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · MAX-01+STR-02 · Wicket Rhythm + Fly 10 + Explosive Sprint Strength | Sprint: Wicket run; Fly 10 | Explosive: Low pogos; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift

BEGINNER 60M/100M — 5 DAYS

- 1 · GEN-ACC-01+STR-01 · General Acceleration Foundation + Force-Oriented Sprint Strength | Sprint: Standing or sport-stance acceleration — 10 m; Standing or sport-stance acceleration — 20 m | Explosive: Standing broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · MAX-01+STR-02 · Wicket Rhythm + Fly 10 + Explosive Sprint Strength | Sprint: Wicket run; Fly 10 | Explosive: Low pogos; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 6 · PLY-01 · Landing + Pogo Foundation | Explosive: Snap-down to stick; Bilateral pogo; Line hop; Low box jump | Strength: Calf/tibialis circuit | Support: Low-day warm-up; Easy downshift

TRAINED 60M/100M — 3 DAYS

- 1 · ACC-02+STR-01 · Falling Start 20s + Force-Oriented Sprint Strength | Sprint: Falling start | Explosive: Pogos; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 3 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · MAX-02+STR-02 · Fly 20 Development + Explosive Sprint Strength | Sprint: Fly 20 | Explosive: Low hurdle hop or pogo; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift

TRAINED 60M/100M — 5 DAYS

- 1 · ACC-02+STR-01 · Falling Start 20s + Force-Oriented Sprint Strength | Sprint: Falling start | Explosive: Pogos; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · MAX-02+STR-02 · Fly 20 Development + Explosive Sprint Strength | Sprint: Fly 20 | Explosive: Low hurdle hop or pogo; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 6 · SED-01 · Two Sets of 3 x 60 m | Sprint: Standing-start 60 m | Support: RAMP sprint warm-up; Easy downshift

ADVANCED 60M/100M — 5 DAYS

- 1 · GEN-ACC-03+STR-01 · Advanced General Acceleration + Force-Oriented Sprint Strength | Sprint: Competition-stance acceleration — 20 m; Competition-stance acceleration — 30 m; Extended acceleration — 40 m | Explosive: Bound or horizontal jump series; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · MAX-02+STR-02 · Fly 20 Development + Explosive Sprint Strength | Sprint: Fly 20 | Explosive: Low hurdle hop or pogo; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 6 · SED-04 · 3 x 120 m Relaxed Fast | Sprint: 120 m relaxed-fast | Support: RAMP sprint warm-up; Easy downshift

REDUCED-READINESS ADVANCED 60M/100M — 5 DAYS

- 1 · GEN-ACC-03+STR-01 · Advanced General Acceleration + Force-Oriented Sprint Strength | Sprint: Competition-stance acceleration — 20 m; Competition-stance acceleration — 30 m; Extended acceleration — 40 m | Explosive: Bound or horizontal jump series; Box jump or broad jump |

Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift

- 2 · TEM-01 · Grass 10 x 100 m Extensive Tempo | Sprint: 100 m extensive tempo | Explosive: Low pogos | Strength: Easy trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · MAX-02+STR-02 · Fly 20 Development + Explosive Sprint Strength | Sprint: Fly 20 | Explosive: Low hurdle hop or pogo; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 6 · SED-04 · 3 x 120 m Relaxed Fast | Sprint: 120 m relaxed-fast | Support: RAMP sprint warm-up; Easy downshift

ADVANCED FOOTBALL/40-YARD — 5 DAYS

- 1 · F40-ACC-03+STR-01 · Advanced 40-Yard Acceleration + Force-Oriented Sprint Strength | Sprint: Competition start — 10 yd; Competition start — 20 yd; Competition start — 40 yd | Explosive: Broad jump series; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift

- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · F40-MAX-03+STR-02 · Advanced Football Upright Speed + Explosive Sprint Strength | Sprint: Progressive build + fly 20 yd | Explosive: Bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · F40-TRANSFER-01 · 40-Yard Transition + Finish | Sprint: Progressive 20 yd acceleration; 40 yd rehearsal | Support: RAMP sprint warm-up; Easy downshift

REDUCED-READINESS ADVANCED FOOTBALL/40-YARD — 5 DAYS

- 1 · F40-ACC-02+STR-01 · 40-Yard Acceleration Development + Force-Oriented Sprint Strength | Sprint: Three-point start — 10 yd; Three-point start — 20 yd; Three-point start — 30 yd | Explosive: Standing broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · F40-MAX-02+STR-02 · Football Upright-Speed Development + Explosive Sprint Strength | Sprint: Progressive build + fly 15 yd | Explosive: Pogos + bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · F40-TRANSFER-01 · 40-Yard Transition + Finish | Sprint: Progressive 20 yd acceleration; 40 yd rehearsal | Support: RAMP sprint warm-up; Easy downshift

BEGINNER GENERAL SPEED — 3 DAYS

- 1 · GEN-ACC-01+STR-01 · General Acceleration Foundation + Force-Oriented Sprint Strength | Sprint: Standing or sport-stance acceleration — 10 m; Standing or sport-stance acceleration — 20 m | Explosive: Standing broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 3 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · GEN-MAX-01+STR-02 · General Upright-Speed Foundation + Explosive Sprint Strength | Sprint: Progressive build + fly 10 m | Explosive: Low pogos; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift

BEGINNER GENERAL SPEED — 5 DAYS

- 1 · GEN-ACC-01+STR-01 · General Acceleration Foundation + Force-Oriented Sprint Strength | Sprint: Standing or sport-stance acceleration — 10 m; Standing or sport-stance acceleration — 20 m | Explosive: Standing broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · GEN-MAX-01+STR-02 · General Upright-Speed Foundation + Explosive Sprint Strength | Sprint: Progressive build + fly 10 m | Explosive: Low pogos; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · PLY-01 · Landing + Pogo Foundation | Explosive: Snap-down to stick; Bilateral pogo; Line hop; Low box jump | Strength: Calf/tibialis circuit | Support: Low-day warm-up; Easy downshift

TRAINED GENERAL SPEED — 3 DAYS

- 1 · GEN-ACC-02+STR-01 · General Acceleration Development + Force-Oriented Sprint Strength | Sprint: Varied-start acceleration — 20 m; Varied-start acceleration — 30 m | Explosive: Repeated broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 3 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · GEN-MAX-02+STR-02 · General Upright-Speed Development + Explosive Sprint Strength | Sprint: Progressive build + fly 20 m | Explosive: Pogos + low bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift

TRAINED GENERAL SPEED — 5 DAYS

- 1 · GEN-ACC-02+STR-01 · General Acceleration Development + Force-Oriented Sprint Strength | Sprint: Varied-start acceleration — 20 m; Varied-start acceleration — 30 m | Explosive: Repeated broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · GEN-MAX-02+STR-02 · General Upright-Speed Development + Explosive Sprint Strength | Sprint: Progressive build + fly 20 m | Explosive: Pogos + low bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift

- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · GEN-INTEGRATE-01 · General Speed Acceleration Integration | Sprint: Smooth 30 m acceleration | Explosive: Low horizontal jump | Support: RAMP sprint warm-up; Easy downshift

ADVANCED GENERAL SPEED — 5 DAYS

- 1 · GEN-ACC-03+STR-01 · Advanced General Acceleration + Force-Oriented Sprint Strength | Sprint: Competition-stance acceleration — 20 m; Competition-stance acceleration — 30 m; Extended acceleration — 40 m | Explosive: Bound or horizontal jump series; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · GEN-MAX-03+STR-02 · Advanced General Upright Speed + Explosive Sprint Strength | Sprint: Progressive build + fly 25 m | Explosive: Bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · GEN-INTEGRATE-01 · General Speed Acceleration Integration | Sprint: Smooth 30 m acceleration | Explosive: Low horizontal jump | Support: RAMP sprint warm-up; Easy downshift

REDUCED-READINESS ADVANCED GENERAL SPEED — 5 DAYS

- 1 · GEN-ACC-02+STR-01 · General Acceleration Development + Force-Oriented Sprint Strength | Sprint: Varied-start acceleration — 20 m; Varied-start acceleration — 30 m | Explosive: Repeated broad jump; Box jump or broad jump | Strength: Back squat or trap-bar deadlift; Barbell or dumbbell RDL; Loaded split squat; Bench press or dumbbell bench press; Pull-up, pulldown, or row; Loaded trunk circuit | Support: RAMP sprint warm-up; Easy downshift
- 2 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 3 · GEN-MAX-02+STR-02 · General Upright-Speed Development + Explosive Sprint Strength | Sprint: Progressive build + fly 20 m | Explosive: Pogos + low bounds; Jump, throw, clean pull, or trap-bar jump | Strength: Front squat or trap-bar deadlift; Hip thrust or RDL; Bulgarian split squat; Bench press or overhead press; Pull-up or row; Trunk or durability circuit | Support: RAMP sprint warm-up; Easy downshift
- 5 · CORE-02 · Bodyweight Athletic Basics | Support: Athletic basics warm-up; Squat; Reverse lunge; Push-up; Pull-up or band row; Single-leg bridge; Calf raise; Side plank; Easy downshift
- 6 · GEN-INTEGRATE-01 · General Speed Acceleration Integration | Sprint: Smooth 30 m acceleration | Explosive: Low horizontal jump | Support: RAMP sprint warm-up; Easy downshift

COMPETITION 60M/100M — 3 DAYS

- 1 · GEN-COURT-ACC-01 · Limited-Space Acceleration Foundation | Sprint: Sport-stance start; Two-point acceleration | Explosive: Snap-down + broad jump | Support: RAMP sprint warm-up; Easy downshift
- 3 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 5 · MAX-06 · Competition-Phase Fly 20 Microdose | Sprint: Fly 20 microdose | Explosive: Low pogos | Support: RAMP sprint warm-up; Easy downshift

COMPETITION 200M/400M — 3 DAYS

- 1 · STA-01 · Block Start Setup + 10-20 m | Sprint: Block clearance; Block start | Support: RAMP sprint warm-up; Easy downshift
- 3 · TEM-03 · Technical Low Day + Strides | Sprint: Wall switches; A-march/A-skip; 60 m stride | Explosive: Low pogos | Strength: Trunk/hip circuit | Support: Low-day warm-up; Easy downshift
- 5 · MAX-06 · Competition-Phase Fly 20 Microdose | Sprint: Fly 20 microdose | Explosive: Low pogos | Support: RAMP sprint warm-up; Easy downshift

IN-SEASON FOOTBALL WITH TUE/THU PRACTICES AND SAT GAME

- 1 · GEN-MICRO-01 · In-Season Linear Speed Microdose | Sprint: Brief acceleration; Progressive fly 10 m | Support: RAMP sprint warm-up; Easy downshift
- 3 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · CORE-01 · Rotisserie Chicken 8-Minute Circuit | Support: Easy movement and rehearsal; High-plank shoulder taps; Dead bug; Push-up or elevated push-up; Bicycle or alternating heel taps; Plank walkouts; Glute-bridge march; Forearm plank knee taps; Bent-knee hollow or dead-bug hold; Slow mountain climbers; Reverse crunch or single-leg lowering; Easy downshift

IN-SEASON GENERAL SPEED WITH TUE/THU PRACTICES AND SAT GAME

- 1 · GEN-MICRO-01 · In-Season Linear Speed Microdose | Sprint: Brief acceleration; Progressive fly 10 m | Support: RAMP sprint warm-up; Easy downshift
- 3 · GEN-LOW-01 · General Speed Low Support Day | Sprint: Relaxed stride | Strength: Lower-leg + trunk circuit | Support: Low-day warm-up; Easy downshift
- 5 · CORE-01 · Rotisserie Chicken 8-Minute Circuit | Support: Easy movement and rehearsal; High-plank shoulder taps; Dead bug; Push-up or elevated push-up; Bicycle or alternating heel taps; Plank walkouts; Glute-bridge march; Forearm plank knee taps; Bent-knee hollow or dead-bug hold; Slow mountain climbers; Reverse crunch or single-leg lowering; Easy downshift

Research rationale and citations

Implementation details are governed by the repository. Scientific rationale is drawn from saved SprintLab research documents. A source ID on a workout means the record was authored with that publication/resource in view; it does not imply endorsement of SprintLab.

14 / HONEST BOUNDARIES

Known limitations and planned behavior

Area	Implemented now	Limitation / planned behavior
Track set fidelity	Library keeps sets and reps.	Execution flattens track sets; must add set-aware track tracking before claiming 2×5 fidelity.
Per-side work	Text may state per side.	No first-class side structure or side-specific result storage.
Readiness regression	Football/General tier can regress and explains why.	Track weekly tier does not regress; daily readiness only changes launch guidance.
Advanced track tiers	Advanced eligibility is honored.	Advanced 200/400 currently selects the same IDs as trained; advanced 60/100 mixes a GEN record.
200m pathway	200m maps to long-sprint pathway.	Weekly architecture's isLongSprint check recognizes only 400m, so 200m uses short-style role preferences.
In-season support	Practices/games are blocked and microdose week is generated.	Tested non-track in-season case contains no meaningful loaded-strength exposure.
Exercise alternatives	Readable alternatives appear in item names.	No typed choice/resolution model.
Approval rigor	Current structural and volume checks pass.	Semantic dose/reference/execution checks requested for V3 are not implemented.
Sports	Football has distinct pathway; others receive General Speed.	No dedicated soccer/basketball/baseball/softball progressions.
Type safety	Planner scripts pass.	Repository typecheck has three app/profile.tsx errors because SprintEvent includes 300m while a helper accepts only 60/100/200/400.
Lint	No lint defects were proven by this audit.	expo lint did not return output within the audit window and was stopped; result is inconclusive.

RELEASE INTERPRETATION

Planner regression scripts pass. V3 is complete as an implementation specification, but it deliberately does not certify the current working tree as free of all application defects.

A / DRAFT & ARCHIVED

Appendix A — Nonselectable records

ID	Name	Status	Category	Reason / state
DRF-01	Assisted/Downhill Overspeed	draft	maximum-velocity	Approved workouts cannot contain TBD content.; Assisted/downhill speed remains draft-only in this prototype.
DRF-02	350 m + 100 m Advanced Special Endurance	draft	special-endurance	Approved workouts cannot contain TBD content.; Stored sprint-volume metrics do not match the section items.
DRF-03	High Drop-Jump Reactive Session	draft	plyometrics	Approved workouts cannot contain TBD content.; Advanced drop-jump content requires explicit reviewer override and cannot be approved by this prototype.
DRF-04	3 x 300 m Special-Endurance Session	draft	special-endurance	Approved workouts cannot contain TBD content.; Stored sprint-volume metrics do not match the section items.

ID	Name	Status	Category	Reason / state
ARC-01	600-500-400-300-200 Ladder	archived	special-endurance	Stored sprint-volume metrics do not match the section items.
ARC-02	Weekly 4 x 400 m Hard	archived	special-endurance	Stored sprint-volume metrics do not match the section items.
